GATOR JAWS

The most versatile Oil Filter Removal Tool ever made!

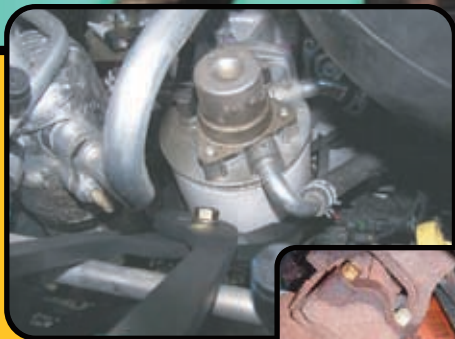

Tired of burning your arms while trying to access a hard-to-reach filter?

Use the Gator Jaws to snake around hot exhaust manifolds and remove tight filters with ease!

All that's needed is a bite from the 32 gripping teeth and even the most difficult, hard-to-reach filters spin off with ease.

The Gator Jaws have been designed for use in both small and large vehicles.

- Removes stubborn, over-tightened filters.
- Can be used on oil, fuel, & hydraulic filters, fuel sending units, and more!
- 23" long, with tremendous holding power.
- 32-tooth jaws adjust to 2 different sizes for optimum grip.
- The Gator Jaws can reach some of the most difficult filters, such as:
 - All 1989 to current Toyota 1.8L, 2.2iL, 2.4L, 3.0L, & 3.5L
 - All V6 1990 to current Lexus 2.5L and 3.0L
 - 1996 to current Chevrolet trucks, Vortec V8, 2/4 wheel drive
 - And many more!
